

Transitioning to the Money Side Supplementary Materials

1. HA – Policy Brief – 13Dec12 – Reducing waste in health care.

A nice summary of waste models and prior research as of December 2012, with a heavy emphasis on fraud and abuse as a source of waste.

Link: <https://www.healthaffairs.org/doi/10.1377/hpb20121213.959735>

2. JAMA – Berwick & Hackbarth – 11Apr12 – Eliminating waste in health care.

A follow-on article to the 2010 Institute of Medicine report, reviewing other studies of waste in health care delivery and providing estimates of the total amount of waste that might practically be eliminated.

Link: <https://jamanetwork.com/journals/jama/fullarticle/1148376>

3. JAMA – Shrank, Rogstad, & Parekh – 7Oct19 – Waste in the US health care system: Estimated costs and potential savings.

A more conservative estimate of waste in the U.S. health care system (by far the lowest estimate of waste published in recent years ... only \$850 billion), along with estimates of what proportion of that waste is within reasonable reach for near-term elimination.

Link: <https://jamanetwork.com/journals/jama/fullarticle/2752664?resultClick=1>

4. IHI – Bueno, Leo, & Macfie – 2019 – Leadership Alliance Trillion Dollar Checkbook: Reduce Waste and Cost in the U.S. Health Care System.

A long list of specific areas in current health care delivery, where waste exists and that should be within reach of waste elimination efforts.
